8. **Normalization**

   MHTCET will be conducting examinations on multiple shifts. The candidates will be given different sets of questions in every shift and it is quite possible that in spite of all efforts of maintaining equivalence among various question papers, the difficulty level of these question papers administered in different shifts may not be exactly the same. In order to overcome such a situation, **Normalization Method** will be used for ensuring that candidates are neither benefitted nor disadvantaged due to the difficulty level of the examination.

   The process of Normalization is an established practice for comparing candidate scores across multi shift papers and is similar to those being adopted in other large educational selection tests conducted in India.

   Candidates will be ranked by their normalized score. Percentile method will be used for ranking candidates.

   Percentile Scores: Percentile scores are scores based on the relative performance of all those who appear for the examination. Basically the marks obtained are transformed into a scale ranging from 100 to 0. **The Percentile Score indicates the percentage of candidates that have scored BELOW that particular score in examination. Therefore the topper (highest scorer) of exam will get the Percentile of 100. The marks obtained in between the highest and lowest scores are also converted to appropriate Percentiles. Lower most candidate will get Percentile of 0.**

   The Percentile Scores will be calculated up to 5 decimal places to avoid bunching effect and reduce ties. The Percentile score of a Candidate is calculated as follows:

   $$\frac{100 \times (\text{No. of candidates appeared in the session with raw score EQUAL TO OR LESS than the candidate})}{\text{Total No. of candidates appeared in the session}}$$

   Top most candidate(s) will have percentile score of 100 while lower most candidate will have percentile score nearing 0. Percentile score will be published to the candidate which is the indicator of his relative merit.

   Percentile score is not the same as percentage of marks obtained.

   Note: Percentile will be calculated for entire population across all the shifts of exam. Basis for percentile marks is the normalized score of the candidate.

Special Note:
   1) Percentile score is not the same as percentage of marks obtained.
   2) Candidate applying for MHT-CET 2019 is deemed to have accepted this Method.
