- The *Oxford English Dictionary* defines the word "career" as a person's "course or progress through life (or a distinct portion of life)". This definition relates "career" to a range of aspects of an individual's life, learning, and work. "Career" is also frequently understood to relate to the working aspects of an individual's life - as in "career woman", for example. A third way in which the term "career" is used describes an occupation or a profession that usually involves special training or formal education,; considered to be a person's life work. In this case "a career" is seen as a sequence of related jobs, usually pursued within a single industry or sector: one can speak for example of "a career in education", of "a criminal career" or of "a career in the building trade". A career has been defined by organizational behaviour researchers as "an individual's work-related and other relevant experiences, both inside and outside of organizations, that form a unique pattern over the individual's life span."

- **A favourable juncture of circumstances.**
- **A good chance for advancement or progress.**

Insurance is a means of protection from financial loss. It is a form of risk management primarily used to hedge against the risk of a contingent or uncertain loss.

Notwithstanding these, there is a sole public re-insurer, specifically General Insurance Corporation of India (GIC Re). Other participants in the Indian Insurance market include agents (individual and corporate), brokers, surveyors and third-party administrators servicing health insurance claims. Although less, but there has been a steady increase in the overall insurance penetration from 2.71% in 2001 to 3.69% in 2017. Speculations projected that the insurance industry as a whole is expected to stretch to US\$ 280 billion by end of 2020. The Life insurance industry, in next 3 to 5 years, being projected to increase by 14-15% per year. The future looks encouraging for the life insurance industry with.

India Life Insurance Industry Penetration and Growth Trend

- there has been a steady increase in the insurance penetration rate in India, however there is an enormous scope for the growth as the penetration is far from reaching a double digit. As of March – FY end 2019, in India, there were 70 insurers; of which 24 were LI, 27 were GI, 7 were stand alone health insurers and 12 are re-insurers including foreign reinsurers branches and Lloyd's India . Life Insurance Distribution Model – Holistic View

- There is broadly two well-accepted distribution model in life insurance
 - – Bancassurance and Agency.
- Bancassurance is the model where a life insurer promotes, positions, and sale their products with collaboration with a bank (Exhibit 11) The arrangement can be several like a JV (Joint venture), Corporate Agency, General Agency, or via Third party. This is a typical model where a bank/insurance employee approaches the bank customer for a sale.

Agency

-
- Agency is the other widely accepted model, where a mediator is recruited on a commission or reward basis who will promote and sell the insurance product to their customer. There are various models in Agency in the industry like APC / BA model, Direct Agency, Mentorship Channel, Venue Marketing, Composite Agency. (APC=Agency Partner Channel, BA = Business Associate) A prominent subcategory of mediators is the Corporate Agents and the Brokers. Unlike a typical agent who can sell insurance for only one company they are associated with, a Corporate Agent can sell life insurance up to and of 3 companies whereas a broker can sell for any of the companies they are associated with. These are the typical offline and the traditional models in the industry where the buyer and the sellers prefer face to face interaction.
 - IRDAI (Insurance Web Aggregators)
 - Regulations, 2017 notified on 13 April 2017 intending to supervise and monitor the Insurance Web Aggregators.
 - At present, the number of certified
 - Insurance Web Aggregator is 27
- A customer majorly used this to compare product options of various organizations and find the right fit for them.
